

Academics & Learning

Bella Vista School is dedicated to preparing our students for success in high school and beyond. Our highly dedicated and trained teaching staff is committed to ensuring that each student receives a well-rounded education. This is accomplished by combining a vigorous academic curriculum with hands on activities. Teaching beyond the textbook enables children to utilize their natural curiosity to make sense of what they are learning in printed form.

When students are exposed to a broad range of educational activities in a positive learning environment, they flourish. Book learning alone will not make for an outstanding nor enjoyable educational experience.

Bella Vista School is proud of the many curricular and extra-curricular activities that it provides such as sports, music, drama, art, Gifted and Talented, and technology programs. These are the kinds of programs that round-out a child's education, and provides him/her with lasting memories.

*"Tell me and I'll forget.
Show me, and I may not remember.
Involve me, and I'll understand."*

Team Work

At Bella Vista, there exists a welcoming, family atmosphere where security, trust, kindness, and respect are mixed with encouragement and challenge to stimulate and support the child. Our school is based upon committed teamwork involving teachers, staff, parents, community members, and children. We want our children to enjoy school, to develop enthusiasm, perseverance and a questioning approach to life that will prepare them for the future stages in their education.

"If you can give your son or daughter only one gift, let it be enthusiasm."
Bruce Barton

It is believed that success in the 21st century will require adults to be well educated academically, adept in technology, creative, insightful, curious, and have good people skills. The staff of Bella Vista School works hard to provide our students with all of these traits.

A Community With Vision

Our school and community continue to look forward with a vision. Our vision is to provide the best education possible for our students, preparing them to become productive, caring citizens of our community.

Bella Vista School is very fortunate to have wonderful facilities on its campus for student and community usage. We have two gymnasiums, a cross-country course, three combination football/soccer fields, three softball/baseball diamonds, indoor and outside basketball courts, indoor and outside volleyball facilities, and a track. In addition to our sport facilities, we have a performing arts center, a dedicated music room, a science laboratory, a computer laboratory, a modern library, and an outdoor learning laboratory, which includes a large pond.

Technology

Student access to technology is priority for our students. All classrooms have computers with Internet access. Our computer lab is state-of-the-art, consisting of scanners, printers, 30 - plus working stations, and multimedia projectors.

Music

All students receive weekly instruction from our full-time music teacher. It is our priority to give our students the opportunity to participate in musical and dramatic performances in our new state-of-the-art Performing Arts Center. Teaching the "whole child", and encouraging students to use all of their talents is important to us at Bella Vista.

Regular homework assignments designed to reinforce daily lessons begin in the lower grades and gradually become more challenging. Lessons are structured to develop the student's study habits, sense of responsibility, and time-management skills.
