

All About Geese
By, Angela LaFond
2nd Grade

In this report I will tell you how great geese are.

Geese have amazing features. Geese have webbed feet. They need their webbed feet to help them swim. The mother goose has black and brown feathers. Her feathers help her hide while she is sitting on her nest. Geese are fun to watch.

Geese live by ponds and lakes. Geese build their nests by water because they eat and swim in it. Geese love to get wet because it is fun. Water is important for geese.

This is all about what geese eat. Geese look under water for food.

Geese eat small fish, snails, bugs, and seeds. They look under water for most of their food.

Geese eat on land too. Geese eat bread when people throw it to them. That's what geese eat.

Geese have enemies. Some of their enemies are foxes, bears, and hunters. Foxes, bears, and hunters kill and eat geese. Geese can hide from their enemies because they have feathers to camouflage them. Geese have many enemies.

Now you know many things about geese and how they survive.
